Recompression  
Pipeline Evacuation  
Cross-Compression

CR offers a near zero methane emission alternative to pipeline evacuation.

Repair, maintain, and test your pipeline without venting or flaring natural gas.

Superior customer experience, safer operations, and a faster more environmentally friendly solution.

## Peak Operational Efficiency

Purpose built design. More capacity in a smaller footprint, to put your pipeline back in service sooner.

No third-party trucking. Ease of mobility. Quick response times.

Patent pending

## GENERAL

- Electric drive
- Compact footprint (32' L x 8.5' W) ea.
- Quiet operation (58 dBA @ 50 ft)

## CODE AND STANDARDS

- API 500, Class 1, Division 2, Electrical Area Classification
- ASME Section VIII, Division I, Pressure Vessels
- ASME B31.3, Process Piping
- ISO 8528-5, Combustion Driven Alternating Current Gensets

## SAFETY AND OVERPRESSURE PROTECTION

### PLC

- Discharge overpressure shutdown

### MECHANICAL

- Equipment - full flow Pressure Safety Valve (PSV) at each compressor stage
- Discharge PSV - adjusted for pipeline MAOP

## PERFORMANCE

- 16,000,000 SCFD max flow rate ea.
